Payment timely?

Get information right and on time to keep shipments moving

- Prevent errors that cause delay by automatically capturing and processing documents
- Improve Quality Assurance with automated processes driven by AI and machine learning

In the decade since the 2008 recession, digital technologies have transformed the pressures and opportunities that logistics companies face, driving a significant rise in customer expectations, for example. Used to the speed, flexibility, and transparency offered by the best e-commerce operations, customers increasingly expect similar service levels across the full spectrum of transportation activities. McKinsey & Company, February 2020

Even in the early days of the recent pandemic, 75% of companies reported significant supply chain disruptions unprecedented in modern times. IndustryWeek

50% of companies plan to accelerate automation and other new ways of working. PwC

Increase document visibility and control to improve shipping where it matters most

Offload the burden of centralized processing to highly distributed local operations

Remove friction from clearances to boost efficiency and customer satisfaction

Are delays increasing your expenses for fuel and labor?

- Get alerts on issues with documents or processes so you can immediately resolve them
- Immediately process data from documents with in-cab, mobile devices and remote scanning
- Offload the burden of centralized processing to highly distributed local operations

How much time is spent responding to inquiries about shipment status?

- Efficiently handle a broader variety of documents to keep supply chains moving
- Improve Quality Assurance with automated processes driven by AI and machine learning
- Get alerts on issues with documents or processes so you can immediately resolve them
- Immediately process data from documents with in-cab, mobile devices and remote scanning

Friction-free document processing is a must

- How often do you find clearances delayed due to missing information?

Get alerts on issues with documents or processes so you can immediately resolve them

- Offload the burden of centralized processing to highly distributed local operations
- Remove friction from clearances to boost efficiency and customer satisfaction
- Get information right and on time to keep shipments moving

- Provide customers, suppliers, and employees with the information about shipments that they need
- Get alerts on issues with documents or processes so you can immediately resolve them
- Immediately process data from documents with in-cab, mobile devices and remote scanning
- Improve Quality Assurance with automated processes driven by AI and machine learning
